Petition to Secretary of State for Health & Social Care

Whipps Cross Hospital Redevelopment – North East London

We call on the Secretary of State for Health & Social Care to provide capital funding of £500 million or funding that equates to at least 75% of the costs of rebuilding our local hospital – whichever is the greater. This is vital in securing a hospital that is fit to meet the future needs of residents of this part of North East London.

We call on the Department of Health & Social Care and NHS England/Improvement to ensure that the plans and costings will:

1. Provide more beds and capacity than in our present hospital to cater for the population growth and our rising elderly population

2. Provide a Type 1 24/7 Blue Light A&E with all the clinical specialisms needed to support it

And ensure the plans are based on very robust evidence and are subject to public scrutiny and consultation.
